## Module 2-R Markdown Document 1

## Monica Cortinas April 13, 2018

#### This a level 1 header

#### R Markdown

#### This is a level 3 header

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see http://rmarkdown.rstudio.com.

Here is a link to Google

Here is a word in **bold** and a word in **bold**.

Here is a word in *italics* and another word in *italics* too.

When we compile our document we are using the R Markdown package. Here are some example R commands:

# 2+2 mean(c(1,2,3,4,5))

Here is an example of a non-numbered list:

- Breakfast
  - food
    - \* eggs
    - \* toast
    - \* bacon
  - drink
    - \* apple juice
- Lunch
  - taco
- Dinner
  - baked chicken
  - broccoli
  - rice

Here is an example of a numbered list:

- 1. Breakfast
  - a. food
    - i. eggs
    - ii. toast
    - iii. bacon
  - b. drink
    - i. apple juice
- 2. Lunch
  - a. taco
- 3. Dinner
  - a. baked chicken
  - b. broccoli

c. rice

Here is an example of a blockquote:

This is a block quote. This paragraph has two lines.

- 1. This is a list inside a block quote.
- 2. Second item.

This is a block quote. This paragraph has two lines.

This text is nested

Here is an example of code in a blockquote:

```
2+2
mean(c(1,2,3,4,5))
```

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

Ahora vamos a probar git a ver qué tal.

Ahora ahremos el push desde aquí.

#### summary(cars)

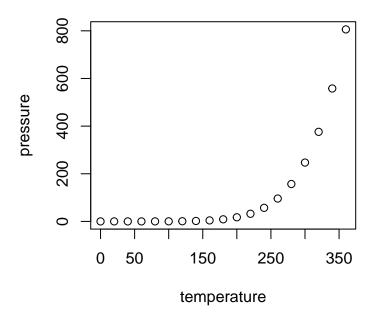

```
speed
##
                         dist
                              2.00
##
    Min.
           : 4.0
                   Min.
                           :
    1st Qu.:12.0
                    1st Qu.: 26.00
   Median:15.0
                   Median : 36.00
##
                           : 42.98
##
   Mean
           :15.4
                   Mean
##
    3rd Qu.:19.0
                   3rd Qu.: 56.00
##
   Max.
           :25.0
                   Max.
                           :120.00
```

## **Including Plots**

You can also embed plots, for example:

Note that the  $\mbox{echo} = \mbox{FALSE}$  parameter was added to the code chunk to prevent printing of the R code that generated the plot.

## **Insert Tables**

Table 1: Top Six Rows of Cars Dataset

dist	speed
2	4
10	4
4	7
22	7
16	8
10	9

## **Insert Equation**

$$Y = \beta_0 + \beta_1 x$$

## Images

Here is an image inserted
